# 2020 Election Voter Survey Georgia GA

The Progress Campaign

Thinking of the 2020 election on November 3rd, are you confident you'll be able to safely cast your vote given the COVID19 pandemic?

<u>Yes</u>	<u>49%</u>
<u>No</u>	<u>28%</u>
Don't Know	<u>23%</u>

The urban and rural divide is stark when asked about personal safety while voting in the era of COVID-19. A clear majority of respondents from both rural and suburban counties say they feel safe voting while only 39% of those surveyed in Fulton County say the same.

HS or less	<u>32%</u>
Some College	<u>20%</u>
College Degree	<u>30%</u>
Postgraduate	<u>18%</u>

#### <u>Methodology</u>

Using random sampling, we sent out text message invitations to an online voter survey with the questions above. Text message invites made up 96% of our final results, with the remaining 4% being done via landline (2%) and cell-phone calls (2%). The results then go through a weighing process to match expected turnout, as projected in the demographics section above. The margin of error is 2% (population: 10,650,000 || exp turnout: 4,180,000) and those surveyed are characterized as likely voters.

31,948 text message invitations were sent out (~9% response rate) along with 750 calls to landlines and cellphones (~15% response rate) over the course of 12 days, from May 4th to May 15th. Final adjustments and weighing were done May 16th to May 20th.
